NUMBER 13

### Rose Wins Game From Wabash and DePauw

The Rose Warriors invaded the Little Giants camp last week and copped the last of the two games with Wabash by the score of 9-8. This was the first taste of defeat for Wabash, having won from State Normal, Purdue, DePauw, Butler and other strong clubs.

Numerous errors were made by both teams but Rose clearly deserved to win owing to their slugging qualities, driving Blacker from the box in the seventh inning. Goldsberry, Wabash's so-called star slabster, fared but little better than his predecessor and was found for six hits in three innings.

Rose scored first with two runs in the second and led, due to errorless ball, until the fourth, when Wabash tied the count at 2-2. In the fifth inning Wabash scored five runs on infield errors, and although Rose had men on bases each inning, Wabash continued to lead 7-2 until the seventh inning when Rose started a swarming bee in which seven runs resulted.

At this point the Wabash rooters became frantic and in the ninth the Little Giants succeeded in starting a rally and threatened to tie the score, but was cut short by one run.

Reinhard pitched excellent ball, allowing but seven scattered hits. On the other hand Rose hit the Wabash pitchers for fourteen bingles and would have won by a large margin, had the Rosemen played errorless ball as they did in the three previous games.

R H E  
Rose ..... 2 0 0 0 7 0 0 - 9 14 9  
Wabash .. 0 0 0 2 5 0 0 1 - 8 7 9  
Batteries—Blacker, Goldsberry and Kessler; Reinhard and Krausbek.  
Umpire—Jensen. Time—2:00. Attendance—500.

Jacob F. Reinking is now traveling for the Wellsville Turbine Company of Wellsville, New York. He is setting up and repairing turbines.

#### THE CIVIL CLUB PICNIC

On Tuesday, May 17, the Civil Club indulged in an inspection trip, ball game, surveying race after a buried treasure at the Hulman farm and vicinity. Starting from the school at 8 A. M. the members drove to Seelyville where the Carpenter Construction Company is paving with concrete a strip of the National Road. Transportation to scene of construction was furnished by the company's industrial railway. The Lakewood mixers, and tamping and finishing machines, are used on this job. A visit to several of the Staunton strip mines was made. Some of the largest steam shovels in the world are used here, taking nine cubic yards at a "bite."

The Juniors challenged the Freshmen to a ball game and so a five-inning game ensued with Cash as umpire. Score:

R H E  
Freshmen ..... 0 0 2 0 0 - 2 3  
Juniors ..... 3 7 2 2 \* - 14 14  
Batteries—Lentz and DeBlois; Forsythe, Hauer, Moorhead, Schroeder and Hocker.

After the carnage was over several of the more adventurous ones went in swimming while the dinner prepared by Mrs. Thomas was being spread. A vote of thanks by the Civil Club was extended to Prof. and Mrs. Thomas. The afternoon was taken up entirely with the surveying race. The course was three-quarters of a mile in length in which numerous obstacles were encountered. The race was won by the party composed of Wilson, Dunlap, Forsythe, Hauer and Cash, after two and one-half hours. The party composed of Dronberger, Spencer, Lentz, Sharpenburg, and Cullen ran a close second digging up their treasure but thirty seconds later than the winner.

The outing was voted a huge success by everyone and brought to a close the season's activities of the Rose Student Chapter of the American Society C. E.

#### INTERFRATERNITY TENNIS

Among the fraternities at Rose, there are some good tennis men. The talent is fairly well distributed, so why not have an interfraternity meet. It should prove of interest to all, and provide an additional source of friendly rivalry.

#### NOTES

Rose Poly evened the count in games won with DePauw, taking the Methodists into camp at the Rose field by a score of 10 to 2. Reinhard was in good shape and let the DePauw batters down with two hits, which were responsible for DePauw's two runs.

Bills, DePauw's star hurler, started against Rose, but the Engineers battled him out of the box in the fifth and Fisher who replaced him fared but little better.

Brilliant support was afforded the pitchers in the pinches. The Rose infield handled nineteen chances with but one bobble while the seven chances of the visitors were taken care of without a mishap.

Rose was the first to score. Brettell first up in third, walked, and stole second. Krausbek struck out, and Brettell stole third. Taggart walked and took second. Conover tripled to deep center, Brettell and Taggart scoring. Boyd singled, scoring Conover.

In the fifth Brettell walked and Krausbek sacrificed. Brettell stole third and Taggart walked. Taggart took second, Conover flied out but Boyd tripled to left, Brettell and Taggart scoring. Boyd scored on Stiffen's single.

Again in the eighth Brettell was hit by a pitched ball. Krausbek forced Brettell at second, then stole. Taggart struck out and Conover walked. Boyd doubled, Krausbek scoring. Stiffen doubled, Conover and Boyd counting, and Stiffen scored on Reinhard's single.

DePauw's runs were the results of errors. Biller missed Darnell's fly and Stiffen let Daviss' easy roller go between his legs. Elwin and Jordan hit safely two runs counting. Line-up and summary:

ROSE POLY		AB	R	H	P	O	A	E

Three-base hits—Conover, Boyd, Jordan. Two-base hit—Steffen. Sacrifice hits—Krausbek, Biller, Steffen. Stolen bases—Brettell, 4; Taggart, 2; Rosenbaum, Davis, Krausbek. Double play—Taggart to Steffen. Hit by pitched ball—Taggart, Brettell, Davis. Left on bases—Rose, 8; DePauw, 2. Hits—Off Fisher, 3 in 4 1-3 innings; off Bills, 5 in 3 2-3 innings. Base on balls—Off Reinhard, 1; off Fisher, 3; off Bills, 4. Struck out—By Reinhard, 3; by Fisher, 6; by Bills, 4. Passed ball—Shepherd. Umpire—Jensen. Time of game—2:00.

**NOTES OF ROSE-DEPAUW GAME**  
Conovers triple should have been good for four bases. The speedy one came in with lots of room to spare but failed to touch third on his tour, so went back. Boyd's hit brought him over, however.  
Boyd led in the attack, getting a triple, double and single in four times at bat.  
Brettell is not credited with a time at bat, being walked three times and hit by the pitcher once.  
Reinhard seemed headed for a no-hit game, but Biller's and Steffen's errors of comparative easy chances unnerved the big boy and two hits followed which accounted for DePauw's runs.  
The team is going fine, so let's get out at root.

### Letter to Alumni

At the request of Dr. White, acting president of the institute, we print in this issue of the Technic an open letter prepared by him and addressed to the Alumni; the letter is self explanatory, but is important and we believe should be read carefully by every alumnus:

"To the Alumni of Rose:

"In my last annual letter to the Alumni I advised them of the efforts which we had been making to secure an appropriation from the General Educational Board to the general endowment funds of the Institute.

"After considerable negotiation and a visit to New York made by the writer and Mr. Ball, a conference was held with the officers of the General Education Board at which the latter were convinced of the merits of our case and agreed to contribute one hundred thousand dollars toward a total sum of three hundred thousand dollars, the whole to be used for endowment purposes.

"This contribution was made contingent upon the raising of the whole of the additional sum by or before March 1, 1923. In other words, we have until that date to secure bona fide pledges to the amount of two hundred thousand dollars, the whole to be paid on or before March 1, 1927.

"On March 1 last Mr. Demas Deming, president of the First National Bank of Terre Haute, and through all of its forty-seven years of existence a friend of the Institute and treasurer of its Board of Managers, announced it as his intention to contribute one hundred thousand dollars to this endowment fund.

"This magnificent response to the appeal of the Institute for aid, whereby one-half of the necessary amount has been subscribed, stimulates the lively hope that we shall within the specified time secure the additional sum needed to secure the contribution from the General Education Board. It is too much to hope that the whole of this can be or will be raised here in Terre Haute and I am making here an urgent appeal to the Alumni and all Rose men to lend their every aid in securing the needed amount, either through personal subscriptions or by enlisting the interest and aid of others.

"I ask the Alumni to take this matter up at their annual meeting in June and to make every effort to carry the plan to a successful conclusion.

"Sincerely yours,  
"JOHN WHITE,  
"Acting President."

R.O.T.C.

Rose will be well represented at the Engineers' Reserve Officers' Training Camp this coming summer. About forty have signified their intention of going and several more names will likely be added before the close of school. Camp Humphreys is located about twenty miles south of Washington in Virginia. It is excellently located, being on the Potomac River and within a half-hour's ride of the Capital. It is divided into two parts, the basic camp and the advanced camp. The basic camp is for freshmen while the advanced camp is for sophomores and upperclassmen who have already had two years of military training. This summer camp lasts for six weeks beginning about the 16th of June and ending the last of July.

#### A REAL BOOSTER

Miss Gilbert, our cheerful registrar, watches every game from start to finish from a seat of vantage in the grand stand. In spite of the intense cold at the Rose-Butler game, Miss Gilbert was on deck and stayed throughout. It is sure a fine display of spirit and an example to those who find something else to do the afternoon of a game.

### Engineers Wallop Butler

#### NORMAL TAKES FIRST OF SERIES

State Normal won the first game of the annual series at the Parsons field by a score of 8 to 5. It was a hard hitting game, nineteen hits being garnered by the two teams, nine being of the extra-base type. The short fields in right and left fields are responsible for a number of hits which would be easy outs for the outfielders.

Rose's first score came in the sixth. Conover first up, struck out, but Boyd beat out an infield hit. Steffen doubled to center, Boyd crossing. Reinhard and Biller were easy outs, retiring the side.

In the next inning Brettell, first up, reached first on an error. Rosenbaum doubled, Brettell being held at third. Krausbek struck out, but Taggart singled, Brettell and Rosenbaum scoring. Taggart stole second and scored on Conover's single. Conover was caught napping and Boyd was thrown out at first.

The last Rose marker came in the ninth. Danner, batting for Krausbek, walked as did Taggart. Taggart was forced at second by Conover, Danner taking third from where he scored on a wild pitch.

The team played better baseball than it did against Wabash and should be in good shape for the next meeting with the Teachers.

#### Notes of the Game.

Taggart played a nice game at second, handling of chances without a skip.

Boyd handled a couple hard ones in nice shape.

The infield played errorless ball, the errors being contributed by Rosenbaum and Krausbek.

In all, ten Rose batters took three swings while but six Normal men struck out.

Krausbek struck out three times, while Brettell and Conover were victims twice.

#### JOURNAL REVIEW

At the meeting Tuesday morning, May 17, Alfred J. Suttie and Russell Snyder were the student speakers. Mr. Snyder spoke on "Market Conditions in the Graphite Industry," while Mr. Suttie gave a review of "Fluctuations in the Silver Market." Mr. Fox finished up the hour with a talk on "Dehydrated Fruits and Vegetables."

Aided by the masterful pitching of Captain Reinhard, Rose had little difficulty in defeating Butler College, by a score of 11 to 0, at the Rose field. Hard hitting was responsible for the Engineers' runs, emassing a total of fourteen hits, nine being of the extra base variety.

Rose's first tallies came in the second inning. Steffen first up, drew a base on ball. Reinhard then picked out one of Brown's offerings and sent it to deep center for four bases. Biller followed with a three base hit and scored on Price's single.

In the third Boyd, Reinhard, Biller and Rosenbaum each connected, the result being three more runs. The seventh was the big inning for the Rose batters. Conover, first up, was an easy out, but Boyd reached first on an error. Steffen, Biller, Rosenbaum and Krausbek each contributed long hits, bringing the Rose score to 11 runs.

The stick work of the Rose nine was exceptionally good. The fourteen hits were good for twenty-five bases and came when hits were needed. This was Rose's first I. C. A. L. win, and the team is looking far better than it did at the beginning.

#### Notes of the Game.

Reinhard's homer was a hit to deep center, and the big boy came home with time to spare. Conover and Taggart were the only Rose men who failed to hit.

Krausbek and Biller each contributed three hits. One of Boyd's two hits was of the infield variety, the Shelburn boy showing lots of speed in beating the throw to first. Reinhard walked five Bulldogs, but made it up by whiffing eight.

Brettell, varsity infielder, was ill and unable to get into the game.

We started one won and one lost. Line-up and summary:

#### BUTLER TAKES ROSE TEAM AT TENNIS

The Butler tennis squad had little trouble in downing the Rose team in their match at the water works court. Wamsley and Bastian, forming the Bulldog doubles team, easily defeated the Rose team, Williams and Dronberger in straight sets 6-1, 6-3. In the singles Wamsley beat Williams in two hard-fought sets 6-4, 7-5. These games were hotly contested throughout, but lack of practice told on the Rose men. In the other singles match Bastian defeated Dronberger 6-3, 7-5. After losing the first set Dronberger came back strong in the second and had the Butler man 5-1 in games but could not hold his lead.

It is hoped that Rose can be represented in the I. C. A. L. match at Indianapolis. From Williams, Dronberger, Bixby, Brunning, Connelly, DuBlois and Penna, a strong aggregation could be gathered.

THE ROSE TECHNIC, Terre Haute, Ind.  
Recognized by the Terre Haute Retail Merchants Association as an Advertising Medium.

Acceptance for mailing at special rate of postage provided for in section 1103, Act of October 3, 1917, authorized December 13, 1918.

This is the first issue of the Technic put out by the newly elected staff and as it happens it is late. As a matter of fact it was overdue before the present staff was elected. We could not doubt give many good reasons for this if we were so inclined, but let it suffice to say that this is not to be the future policy of the new staff. It is our intention to get the Technic out on time and furthermore to make its interest increase with each new number. We want to give it a new life and make it worth while reading. This is by no means an easy task and as we are new and somewhat unexperienced we cannot hope to do this alone. We need your co-operation. If you think that the Technic is not all that it should be, tell some member of the staff what you think is wrong. We are always open to criticism and suggestions. Some things may happen around the school that escape the attention of the staff. Write them up and drop them in the box. Let's all work together to make the Technic a real paper, one that will be a credit to old Rose.

It would be wholly unnecessary to ask if you have noticed the high class baseball that our team has been playing in the last few games. Every Rose student has undoubtedly noticed it. Show your appreciation by being on hand at every game to support the team as well as by encouraging the players individually. It must be admitted that it is hard to support a losing team, but it is not necessary now, as we have a winning combination and with your support they can keep on winning—even from the lowly Normalites who seem to have a corner on all the luck.

## INTERFRATERNITY BANQUET

April 29, the first annual banquet of the Indianapolis Interfraternity Association was held at the Claypool. This association was formed this year following the presentation of the fraternity taxation bill in the state legislature for the primary purpose of protecting and advancing all fraternities in the state. This bill, working an injustice on all fraternities in the state, met with pronounced disapproval from all frat men in Indiana. Realizing that defeat of such a proposal would come only after a hard, concentrated fight, the Interfraternity Association was formed at Indianapolis, membership being open to all national fraternities in the state. For this meeting bids were sent to eighty-one chapters throughout Indiana, whose fraternity was a member of this association, and over 250 men responded. This society promises to be an important factor in Greek letter life in this section as can be seen from the hard, swift fight at Capitol when the bill was presented for vote. By almost a unanimous margin the bill was killed depicting success for this association in its first attempt to uphold its purpose and aim. Fraternity men at Rose present at the banquet are: Armstrong, Royer, Wollen and Penna, all of the Theta Xi fraternity.

## NOTES

Western athletes showed their heels in the recent carnival held by Pennsylvania scoring heavily in the pole-vault, shot put, high jump, discus heave, and the four mile relay. The French team entered in the same meet, of which so much was expected.

## WHY NOT BE A CITY MANAGER?

### A NEW PROFESSION FOR ENGINEERS

The National Institute of Public Administration offers practical professional training for prospective city managers and public administrators. Special courses for engineers and other technically trained men who need to broaden their knowledge concerning budgets, assessments, taxation, accounting, debt administration, personnel management, purchasing, public health, police, fire, and public works administration. Formerly the Training School for Public Service of the New York Bureau of Municipal Research.

1921 Announcement on Request

National Institute of Public Administration  
261 Broadway, New York City

# Are you going to be a "drop-forged" engineer?

*There are thousands of that kind and, soon or late, they learn with a shock that they can get just about so far, and no further*

THREE big eastern university engineering societies held a joint meeting recently. They were alumni men of technical colleges. And they met to discuss the outlook of the college trained engineer.

"The trouble," said a speaker, "is that too many of us are 'drop-forged' engineers. We know our profession; but of Business, to which it is so closely related—we just don't know what it's all about."

In the files of the Alexander Hamilton Institute is the story of a graduate of a great engineering college. With all his training and his degree, he was a "drop-forged" engineer.

"When I left college I did not know the A B C of how to consider even the simplest of business problems," he wrote.

Upon leaving college, he started to work as an engineer for a big technical firm at \$70 a month. He is still with that firm. And this is what he writes:

"Today I am part owner of the firm and sole manager of it. This hasn't been due to luck by any means; but simply by putting into practice what anyone can get from the Modern Business Course and Service of the

Alexander Hamilton Institute."

### It is not enough to know the technical side alone

The director of a western engineering college said recently: "The most dominant characteristic of the engineering profession is the preponderance of the commercial over the technical."

Step by step, the engineering enterprises that achieve big success, and make careers for engineers, are guided by the same fundamental laws and practices that rule modern business. And thousands of engineers have learned by bitter experience that without business training, technical training carries a man just about so far, and no farther.

### A Course whose product is understanding

The Alexander Hamilton Institute was founded by a group of business men and educators who realized that modern business was developing specialists, but not executives; that somehow more men must be taught the fundamentals that underlie the operations of every department of business.

The Institute has only one Course. It takes a man out of college and gives him a working knowledge of all the departments of business.

Such a man receives in a few months of reading what ordinarily would consume years of practical experience. He finds in the Institute a more direct path

from where he is to where he wants to be. He has the satisfaction of carrying large responsibilities while he is still young. Naturally and inevitably he earns more than the average man of the same years and education.

For the "drop-forged" engineer who asks himself "Where am I going to be five years from now?" the Alexander Hamilton Institute has an encouraging story to tell. It is the story of the thousands of successful college men—many of them engineers—who have saved the wasted years; men who, thru the Course and Service, have added to their technical equipment the training which makes them understand what business is all about.

### "Forging Ahead in Business"

"Forging Ahead in Business" is a 116-page book especially prepared for men who are taking stock of their prospects and wondering what the future may hold for them. It is not a book for idlers, or men of feeble purpose. But to men who seriously want to know what the Course has done for others in positions like their own, the book will be a revelation. It will be sent without obligation. Just send the coupon below.

pected finished next to last in the mile relay.

Illinois seems to be having but little opposition in the conference baseball race. So far they have lost no games and won the majority of their games by a decisive score. The strong Iowa squad was set back 17 to 2 recently.

Ohio state and Indiana hooked up in a nice game of baseball, the Buckeyes winning 2 to 1.

Indiana handed Franklin a 7 to 0 setback, the Baptists getting but two hits off Campbell and Faust.

Big scores have been prevalent in the Big Ten. Purdue beat Northwestern 15 to 2 and Ohio State beat Chicago 20 to 5.

State Normal took Butler into camp at baseball by a score of 9 to 5. The Capital City's tennis team, however, evened up the count when it took straight sets in the singles and doubles events.

The Cornell paper in a recent publication, commented on the number of former Cornell baseball men in the big leagues. Although they have their Eddie Collins, we have our Art Nehf.

Wabash had little trouble in disposing Normal, hitting the Teachers' pitchers for fourteen hits in a 13 to 1 win.

## THE ROSE TECH RIFLE CLUB

The Rifle Club is now a live and growing organization at Rose. The shooting is under the supervision of Prof. Peddle. There is shooting every Saturday afternoon at the Fort Harrison range with an average attendance of about eight members. Anyone wishing more information concerning the club see LeRoy Wilson, secretary of the club.

### NEW TECHNIC STAFF ELECTED

At the meeting of the retiring Technic staff held on Wednesday, May 11, the following men were elected to comprise the staff for next year: Editor-in-chief, R. Lee Henderson; assistant editor, Jack J. Joslin; athletics, Harry J. McDargh; differentials, John J. McCormick; cartoonist, Francis L. McCullough; business manager, Henry Y. Offutt; advertising manager, Carl B. Royer; assistant advertising manager, Russell A. Corban; circulation manager, Leroy A. Wilson.

The following men have been appointed as reporters: Willis E. Williams, Alonzo R. Watson, Douglas A. Kelshaw, John W. Moorhead and Ray Fitterer.

### GENERAL ASSEMBLY

At the general assembly of May 11, Captain F. Cline, under the auspices of the American Red Cross, gave a lecture on first aid. He accompanied this by demonstrations using "Fat" Hocker, Reddy and several other students as subjects. The captain emphasized the fact that everyone should know how to care for a drowning person. The method of reviving anyone from an unconscious state was also explained. In this connection he was strongly opposed to the use of the lung-motor or pulmotor, stating that any mechanical respiratory device tears the tissues of the lungs, thus often killing the patient. The lecture was both interesting and beneficial to those students who attended.

### ROSE TAKES TENNIS MATCH

The DePauw tennis team suffered defeat at the hands of Williams and Dronberger last week-end by the scores 6-3, 1-6 and 6-2. Williams won his singles 6-3, 6-3, while Dronberger dropped his 7-5, 7-9, 3-6. Taking into consideration the condition of the DePauw men, Rose did splendidly in bringing home the large end of the score.

## FRATERNITY NOTES

### Alpha Chi Sigma.

Iota chapter recently held a very successful wiener roast at the Hulman farm. Those present were the members and pledges of the chapter and their lady friends and Prof. Thomas, Dr. and Mrs. Johannott, Mrs. John White, Prof. A. T. Child, Prof. E. L. Fox, Mrs. McCullough, Lieut. Montgomery and Miss Daily.

The evening was fine and a very good time was had by all.

It is planned to give the annual boat ride and dance for members and pledges on June 4th this year.

Brother John M. Sanford has started in business as a consulting chemical engineer and has his office and laboratory in the Reo building.

### Sigma Nu

On April 19th the Sigs gave a dance at the Deming Tavern in honor of the pledges, who, after spending several hours in decorating the hall in the fraternity colors of gold, black and white, were allowed to step forth into the fraternity social activities with their choice of the fair sex. The dance proved to be a very enjoyable affair.

On April 25th and 27th Pledges Hauer, Moorhead, Fischer, Wilkens, Downen, Forsythe, Brinton, Simms, Garrett, Schroeder, Bogardus and Skeeters were initiated.

The chapter observed Mothers' Day, which is also memorial day for Beta Upsilon, by attending the First Congregational Church. After church the members all went to the house for dinner.

### Generous.

"I say, porter, did you find fifty dollars on the floor this morning?"

"Yes, suh. Thank you, suh."

—Brown Jug.

### Street Cries.

Traffic Cop—Hey, you! Didn't you hear me yelling for you to stop?

Sergeant—Oh, was that you yelling? I thought that was just somebody I'd run over!

### A Tragedy.

Tragedian—Yes, I played Othello last season. Got two hundred dollars a week.

Comedian—What did you do the other fifty-one weeks?—Life.

### It Might Be So.

If a man says yes he means maybe; if he says maybe he means no, but if he says no he's no diplomat.

When a woman says no she means maybe; if she says maybe she means yes, but if she says yes she's no lady.—Whiz-Bang.

### Quite a Habit.

Frosh—Moorhead sure has got the pinochle habit, hasn't he?

Soph—Yes; he even walks with a shuffle.

### Too Realistic.

Childs (in metallurgy, illustrating the iron blast furnace)—Now here's where the red hot metal runs into the molds to form pig iron.

Landrum—Say fessor, move that back a little; it's too hot back here.

If they confiscate your "licker" you have no kick coming.

### Pat and Mike Again!

Pat and Mike staggered weakly to the rail of the pitching liner.

"Begorra," said Pat, "Oi don't blame Christ for walking."

### PANAMA CANAL EMERGENCY DAMS

GATUN LAKE, eighty-five feet above sea level, is the reservoir holding the water to feed the Gatun Locks (which lead to the Atlantic) and the Miraflores and Pedro Miguel locks on the Pacific end of the Canal.

Every ship going through the canal in either direction uses the water from Gatun Lake to lift it from the one ocean and lower it into the other. Should some accident destroy a lock, the weight of water released might force down the others and cause tremendous damage and, by lowering the level of the lake, make the canal inoperative until rain had refilled the lake.

Therefore these big emergency dams were constructed. Normally they are not used. In emergencies they would be swung over the locks, the gates would drop into position and effectually dam the opening.

Otis engineers designed, constructed and installed the machinery for operating six of these gigantic dams. It is a feat typical of the worldwide scope of Otis activities in engineering and the vertical transportation of men and materials.

Most of the famous buildings of the world are equipped with Otis Elevators.

SUITS PRESSED 50c  
Woodsie D. Fuqua, Prop.

Dear Bill—What range of mountains  
did Napoleon cross, what year, and  
what mode of travel?

I am not much of an historian but  
I think it was in 1492 that Napoleon  
crossed the Rockies in a canoe.

## Differentials

**Warning.**  
"What's the extreme penalty for  
bigamy?"  
"Two mothers-in-law."  
—Whiz-Bang.

**Good Idea.**  
Boss—What would you do if we  
were to exchange places?  
Office Boy—Fire the office boy, sir.  
—Life.

**No Wonder.**  
Bluck—Why do vessels leaving New  
York make the greatest speed the first  
three miles?  
Blynk—The bartenders help stoke.  
—Life.

**Latest Style.**  
First Amateur Gunman—I've got to  
get busy and get me a new winter  
overcoat.  
Second A G—What restaurant do  
you get yours from?—Life.

**Synonymous.**  
Old Robinson (inspecting young  
R's "personal expenses" account for  
last college term)—What do you  
mean by \$40 for tennis?  
Young R. (easily)—Oh, that's for a  
couple of rackets I had to have.  
Old R. (severely)—Yes, I under-  
stand, but I think we used to call  
them bats.—Princeton Tiger.

**A Twice Told Tale.**  
A teddy bear sat on the ice  
As cold as cold could be;  
But soon he up and walked away,  
"My tale is told," said he.

**Time and Again.**  
He—May I hold your hand for a  
second?  
She—How will you know when the  
second is up?  
He—Oh, I'll need a second hand for  
that.  
—Brown Jug (Brown University).

**Does This Mean You?**  
Fond Father—My boy, what do you  
expect to be when you get out of  
college?  
Devoted Son—An old man, father.  
—Banter.

**Can't Blame Him.**  
Red Head—How come you're so  
bald?  
Baldy—I was late when they passed  
out the hair, and they had only red  
hair left, so I didn't take any.

**Maybe So.**  
It is rumored that the bootleggers  
are going to wear badges, so they  
won't be trying to sell to each other.

**Oh, Go On!**  
"Yes, Elmer, Ring Lardner is wit-  
ty, but the fellow that wrote 'Snow-  
bound' was whittier."

**Glee Club.**  
Wear dark suits and stiff collars to  
the concert Friday, and full dress Sat-  
urday night. The angel chorus need  
not dress for either performance—  
Crimson.

**Probably Not.**  
"I can't live without your daugh-  
ter."  
"Well, can you live without her  
father?"

**Is That So?**  
He—Do you like pop corn balls?  
She—I don't know. I never was to  
one.

**Twelve to a Case.**  
Biggs—There goes a reliable fel-  
low; never lost a case of mine.  
Jiggs—Your attorney, eh?  
Biggs—Attorney nothing! He's the  
drayman who helped me move seven  
times last year.—Life.

## THE GOBOON

VOLUME II.

All Contributions Cheerfully Received

NUMBER 12

**Clever Lad.**  
Among the clever young members  
of the younger set, Robert Ready  
blossoms forth prominently. Recent-  
ly in qualitative analysis, Reddy, after  
asking for an unknown, donned a  
false moustache and followed Fox  
when he went after it, discovering  
what was put in it. In addition to  
this he succeeded in posing as a rub-  
ber stock agent, and interesting the  
alert Fox in said stock.

**Society Notes.**  
None of the Junior Chemists were  
up the river today.  
George Roll, the fashion plate of  
the Freshman class, has started wear-  
ing his straw hat, so all the boys  
who wish to keep in style should fall  
right in line. It might be stated here  
that Prof. Brown has retrieved his  
straw kelly from the winter moth-  
balls.  
Harry S. Fitzsimmons and E. C.  
Scott of the Junior Chemists attended  
the Isham Jones dance last Tuesday.  
They reported the fire escape crowd-  
ed.

**Civil Club.**  
At the last meeting of the Rose  
Tech Civil Club several important  
items were up for consideration.  
Beech-Nut was officially adopted by  
the society and anyone caught using  
any other brand will have to clean  
the cuspidors for two weeks. A stan-  
dard cuspidor was also adopted by  
the club. This is to have an extra  
large mouth so that even the ama-  
teurs can hit it from considerable  
distance, and will also be equipped  
with a Maxim silencer so that Tommy  
can not hear the gobs hit bottom. An  
order was placed for two dozen army  
cots which will adequately fill a long-  
felt need in this department. The  
club is certainly doing a great work  
in securing these conveniences for  
the Civils. The chairman adjourned  
the meeting as usual by blowing rev-  
erille. The next meeting will be held  
either at the drug store or the Hipp.

**Outrageous!**  
Francis E. Step, 22, was coming to  
school as usual last Wednesday morn-  
ing when an officer of the law stopped  
him at Eighth and Wabash and asked  
to see his hand bag. After finding  
that it contained only school books  
he, of course, released young Step  
who very indignantly seized the sat-  
chel and continued on his way to  
school. The officer told a Goboon re-  
porter that his attention was first at-  
tracted by the day on Step's shoes and  
when he saw the hand bag he readily

concluded that the lad was a bootleg-  
ger and had a still in the middle of a  
swamp somewhere. Needless to say,  
our Francis was very much embar-  
rassed by this occurrence.

**New Physicist.**  
A new prodigy has been recently  
discovered in our midst, it being none  
other than young Harold Moench.  
Harold is such a wiz at physics that  
Jojo proudly exclaims, "Me and  
Moench."

**Seniors Injured.**  
One day last week considerable  
commotion and excitement was  
caused by the Seniors in the front hall  
of the main building. This was oc-  
casioned by their mad rush to pay  
their diploma fees to Miss Gilbert.  
Several of the last year men were  
trampled and otherwise injured in the  
scramble. Carl J. Dedert had his  
Adam's apple dislocated and Herman  
Krausbek reports that two teeth were  
knocked out of his spare set. It was  
at first thought that Robert L. Til-  
ley had a dislocated eye-brow but this  
later proved to be a moustache. Some  
other arrangement will be made next  
year for the payment of this fee.

**To a Doughnut.**  
Oh, crude and lowly piece o' dough,  
You've now assumed your place;  
You are a benefactor to  
The hungry human race.

You're just a tasty bit of dough  
That's twisted in a roll;  
And browned and rolled in sugar,  
Then bent around a hole.

With all your imperfections, still  
We all will take a chance,  
And sneak off to the corner store  
By jumping o'er the fence.

We leave phys. lab. and shop for you  
As well as chem. lab., too;  
You fill an aching void for us;  
I'll say we're strong for you.
